

POWER PRODUCTS

Customer Service: (888) Num1Rep (888-686-1737)

IR is the #1 provider of military and aerospace power conversion products including power semiconductors, DC/DC converters and motor control products. Space level hybrid and discrete power supply products.

Totex designs and manufactures custom rechargeable battery packs of all chemistries as well as a family of custom modular chargers. China and US based contract manufacturing services available as vertical service.

Global leader in high efficiency, high density board level DC/DC converters; Compliant PoL converters.

Green, high-efficiency front end power for OEM applications; telco rectifiers; power systems from 500W to over 30KW.

EOS brand, high density, cost effective switching power supplies for medical, telecom and commercial applications. Internal and energy star external models ranging from 25W to 300W.

Custom power supplies for the medical, industrial and commercial marketplace.

Orange County Office
200 Newport Center Drive #304
Newport Beach, CA 92660

CONTRACT MANUFACTURING

Foxconn is the global leader in contract manufacturing and vertically integrated solutions with 33 million square feet of manufacturing space spread over 14 production facilities and 12 R&D locations in Asia, Europe and the U.S.

Microsemi specializes in military and aerospace semiconductor packaging of digital and RF components, memory die stacking in addition to circuit card assemblies; Class K, space level certified expertise.

OSI is a CM specializing in medical products including life support and implantable devices, as well as serving the military and aerospace market, and industrial applications. OSI has AS9100 as well as FDA and UL Medical approved facilities.

Vertically integrated, extremely capable, world-class contract manufacturer.

Diverse military supplier of systems, components, engineering and contract manufacturing.

Aluminum Diecast, Metal and plastic injection. Thermal Products, heatsinks and LED lighting.

Los Angeles Office
2659 Townsgate Road #205
Westlake Village, CA 91361

Fax: 818.735.5499

DISPLAY & HUMAN INTERFACE

Sony Visual Image Products Group specializes in block, machine vision, IP/network, and smart cameras.

TFT LCD manufacturer for Monitor, TV and Open Market applications – from less than 2 inches to over 85 inches.

Open frame LCD; custom panel mount and hi- bright solutions.

Segmented and graphic LCD products and contract manufacturing services.

Designs and manufactures optical filters for the flat panel display market.

Resistive touchscreen products; glass-based projected capacitive solutions.

Embedded Industrial & Commercial single board computers; all-in-one computers; Standard & customizable OEM & ODM solutions.

Global supplier of high quality, fabricated glass components, optical thin film coatings and custom glass designs and solutions for electronics.

Global leader in line scan cameras and large format CMOS area sensors for specialty automotive, medical and industrial applications.

B2B OEM Monitor division supplying CCFL and LED backlit LCD monitor products, private labeling and customized high-volume monitor solutions.

Commercial memory solutions provider for OEM applications.

About Us...

Since 1973, Varigon Inc. has been a leading manufacturer's rep firm in Southern California, helping thousands of electronics companies complete their product designs on time, and with minimal obstacles, from component selection to production. Varigon's **Components and Subsystems Division** focuses on specific high value markets and applications that include medical, military, telecom and industrial sectors. Varigon proudly represents the global leader for many of the products they sell including Sony, LG Display, International Rectifier and Ericsson.

In 2006, Varigon formed a second division – **Varigon Manufacturing Solutions** – to help their Southern California customers with their OEM and ODM electronic manufacturing needs. Varigon proudly represents such notable contract manufacturers as Foxconn and Ricoh, as well as several specialty contract manufacturers addressing military (up to class K), medical (patient attached as well as implantable and life support), commercial/consumer, and high-mix, low-volume industrial applications.
